

RED LINE 2-STEP TRASMISSION SERVICE KIT

Red Line Synthetic ATF Cleaner is a uniquely blended synthetic oil base transmission flush for use with automatic transmission fluid. When introduced into transmissions, it safely cleans light varnish and other deposits from the transmission's internal components (metal and electronic), preparing the system for new transmission fluid.

Red Line Synthetic ATF Supplement is a uniquely blended product specifically formulated for use in automatic transmissions. It incorporates a high-quality synthetic base stock with SE (synthetic esters) to reduce heat and wear. It extends transmission fluid life over normal transmission fluid alone. This supplement also incorporates friction modifiers and boundry lubricants to optimize transmission performance with lower operating temperatures

Applications

- All Step Type Transmission Applications
- Blends with all domestic and worldwide OEM automatic transmission fluids

Features/Benefits

- Safely removes light varnish and other deposits
- Cleans all internal transmission components
- Contains no alcohol or damaging chemicals
- For use with or without flushing machines
- Prepares system for new fluid
- 4X less wear than normal transmission fluid alone
- Prevents and instantly eliminates torque convertor shudder
- Prevents overheating and oxidation
- Enhances shift quality and durability
- Prevents clutch chatter
- Compatible with all automatic transmission fluids
- Red Line Service Chemical Pre-Owned Vehicle Protection Program coverage (if used every 30,000 miles)

Recommended Service Procedure

Without Flush Machine

- Add one bottle of Red Line Synthetic ATF Cleaner to transmission fluid
- With vehicle on lift, start engine and circulate for 5 minutes cycling through all gears
- Drain fluid
- Purge twice if needed
- Refill with new ATF and Red Line Transmission Protectant

With Flush Machine

- Follow manufacturers' directions

Recommended Service Procedure

- Add one bottle of Red Line Synthetic ATF Supplement to your automatic transmission fluid with engine running at idle
- Transmission should be in park
- For transmissions with a capacity greater than 10 quarts, add 1 oz. of Red Line Synthetic ATF Supplement per quart of transmission fluid
- DO NOT OVERFILL
- 4x4 transfer cases: add 1 oz. per quart of transmission fluid
