Disc Brake Caliper Lube

DBC GREASE is formulated to reduce brake noise, vibrations and harshness (NVH) by dampening **all** natural brake vibrating frequencies. It is made from pure base oils and treated with the latest rust, oxidation and anti-wear additives to provide lasting protection against friction, wear and corrosion. It is fortified with a high concentration of Molybdenum Disulfide (Moly) lubricating solids that will stay in place and protect at extreme temperatures from -50°F to over 550°F, while providing protection against dirt, corrosion and uneven pad wear.

DBC GREASE was originally designed as a high performance problem solving, anti-wear and anti-corrosion lubricant for all moving caliper hardware, backing plates and seals of Disc Brake Caliper assemblies.

ADVANTAGES

- PREVENTS RUST & CORROSION**
- SILENCES CALIPERS**
- WATERPROOF, WILL NOT WASHOUT**
- WIDE TEMPERATURE RANGE**
- LASTS THE LIFE OF THE PADS & SHOES**
- REDUCES WEAR**
- NON-MELTING**
- CHEMICAL RESISTANT**

Package

2 gram package / 2000 units per case

Part

10036
